

Sharon Rogers

2 Y Syllabus

Our goal is to introduce basic concepts in a warm, nurturing environment, which will encourage children's development.

In the beginning of the year, the classroom is uncluttered. This allows the children to know quickly where everything they need is located. This, also, encourages independence and ownership. Two year olds change rapidly through the year, so the classroom itself will change. As the children grow and develop, more centers and activities are added.

Young children learn by exploration and experimentation. We introduce basic concepts through games, songs, and open-ended creative activities. Social, language, fine and gross motor skills develop, as the children are guided through the classroom environment.

Feel free to contact me if you have any questions, comments, or concerns about your child. You may leave a message in the school office and I will respond to your call as soon as I am able. Keep in mind, sometimes this will be outside of your child's classroom hours.
