Keisha asked her classmates about their pets.

She made this bar graph to show the results.

Use the bar graph to answer the questions.

How many students have a dog or a cat? 14

How many students have no pets? \_\_\_\_\_

Which pet do the most students have? \_\_\_\_\_

How many students have either a fish or turtle? \_\_\_\_\_

How many students did Keisha talk to? \_\_\_\_\_

**Lesson 6.18** Reading Picture and Bar Graphs

Sam and his friends collect baseball cards. This picture graph shows how many cards they have.

# Cotton: From Field to Closet

*Read to see how your cotton clothing is made.*

<sup>1</sup> Are you wearing jeans or a t-shirt today? Chances are good that some part of your clothing is made out of cotton. How do those puffy little cotton balls out in the field get to your closet?

<sup>2</sup> First, those white cotton balls are, in fact, fine hairs growing out of many tiny seeds. After the cotton is picked, it is cleaned and dried. Then, the cotton is

separated from the seeds. A machine called a cotton gin does this. The ginned cotton is then pressed into 500-pound bales and sent to a mill.

<sup>3</sup> At the mill, the cotton is spun into yarn or thread. Then, huge mechanical looms weave the thread into fabric. Finally, the cloth is cut and sewed to make a shirt or a pair of jeans, just like yours.

# Pool Rules

*What do the girls learn?*

<sup>1</sup> At eleven o'clock this morning, the city pool opened for the season. At two minutes after eleven, Katie and Sara were in the girls' locker room. They wanted to be the first ones into the pool.

<sup>2</sup> "I'll race you!" yelled Sara as she dashed out of the locker room door. Katie was right behind her. They were halfway across the hot cement when they heard phweeeet! "Walk, please!"

<sup>3</sup> Katie slowed and turned toward the lifeguard. She felt terrible. She knew they shouldn't have been running. At that moment, her foot went out from under her. Down she went, backward and sideways all at the same time. Ouch! She scraped her elbow on the cement.

<sup>4</sup> Sara and the lifeguard were beside her in an instant. "Are you okay, Katie?"

<sup>5</sup> Katie made a face. "I think so, but next time I think I'll walk."

# Castles

*What do you already know about castles?*

## **Why do castles have walls?**

<sup>1</sup> Have you ever seen a castle without walls? They all seem to have them, don't they? The walls are for protection. At least, they used to be. Hundreds of years ago, the main reason for building a castle was to protect yourself from your enemies.

## **Why do castle walls have notches?**

<sup>2</sup> What if your enemies attacked you? You couldn't just hide. You probably had to fight back. So you sent your knights or the townspeople up to the walls. They may have had rocks to throw or arrows to shoot. Either way, they took aim through the openings, or the lower parts of the notches. They stood behind the higher parts of the notches to protect themselves from whatever the enemy was throwing or shooting back up at them.
